

PRESS RELEASE

Safety Operating Systems Announces IS-BAH Support Services Affiliation

Washington, September 19, 2014: Safety Operating Systems (SOS) announced Friday that it is now a participant in the IS-BAH (International Standard for Business Aircraft Handling) Support Services Affiliate Program. In addition to offering Audit services for IS-BAH, SOS now has the ability to prepare organizations for the IS-BAH audit for Stage 1, 2, and 3.

The IS-BAH Support Services Affiliate Program was established to improve the quality of support services provided by organizations assisting operators in implementing the IS-BAH. Safety Operating Systems has demonstrated the knowledge of the IS-BAH and can provide services and products to business aircraft handling operators wishing to become or remain IS-BAH registrants. Specifically, the services provided will assist an operator to achieve, improve, or retain IS-BAH registration.

IS-BAH is designed to promote use of industry best practices blended through a progressive Safety Management System (SMS) for Fixed Based Operations (FBO) and Business Aircraft Handling Agencies (BAHA). It provides baseline requirements for structuring a FBO/BAHA in the planning and conduct of their operations; it challenges these organizations to review their current systems, programs and procedures, recognize strengths and weaknesses in those procedures, and upgrade to a higher standard. The standard is based on International Civil Aviation Organization (ICAO) standards and recommended practices in the preparation of handling business aircraft.

Headquartered in Washington, DC, Safety Operating Systems is one of the world's leading aviation consultancies.
